PROFESSIONAL SUMMARY

Enthusiastic and detail-oriented B.Com(ComputerApplications) graduate with technical expertise in Python full-stack development. Passionate about building efficient, scalable webapplications and solving complex problems through coding. Seeking an opportunity to apply my skills in backend and frontend technologies, database management, and API integration to contribute to innovative software solutions in a dynamic work environment.

EDUCATION

Bachelor of Commerce – Computer applications (2021-2025)
Sri kavitha Degree college
CGPA: 6.60

Intermediate -Board of Intermediate Education (2019-2021)
Krishnaveni Junior College
CGPA: 5.6

Class X-Board of Secondary Education (2018-2019)
Vani Vivekananda Vidyalayam
CGPA:8.2

TECHNICAL SKILLS

Programming languages: Python

Python-concepts:Datastructures,Loops,Functions,Decorators,Generator, OOPS

Database: MySQL

MySQL-concepts:Commands,Constraints,Clauses,Subqueries,Joins,Pre-definedfunctions.

Frontend technologies:HTML5,CSS3,JAVASCRIPT,BootStrap

Frameworks: Django

PROJECTS

1. Title: Vegetable shop inventory and sales management system.

Tools: Python, MySQL.

Description: Built a console-based inventory and sales management system using Python.Included features such as inventory tracking, price updates, customer billing, profit calculation, and revenue reporting.

Responsibilities:

- Planned, coded and tested the entire application independently.
- Conducted thorough testing and debugging to ensure application stability,accuracy,anduser-friendly operation.
- Maintained clear, menu-driven user interface susing formatted console output for a smooth user experience.

2. Title: Bank Management System.

Tools: Python, MySQL (MySQL.Connector).

Description: Created a console-based bank management system in Python that interacts with a MySQL database to simulate core banking operations. The system supports user registration, authentication, account management, and transaction tracking for both admin and users.

Responsibilities:

- Engineered backend logic using Python and integrated it with MySQL for persistent data storage.
- Applied input validation for secure user registration and authentication.
- Constructed optimized SQL queries to manage user accounts and transaction history effectively.

3. Title:Wegooo BusBooking System(Full Stack Project using Django & React).

Tools: Python, Django, ReactJS, REST API, MySQL.

Description: Developed a full-stack bus booking platform enabling user registration, seat selection, online payments, and ticket generation with Razorpay integration; built REST APIs, managed MySQL backend, and implemented admin features for route, bus, and pricing management.

Responsibilities:

- Designed and implemented models, views, and REST APIs in Django for user and admin functionalities.
- Integrated ReactJS frontend for dynamic seat selection, real-time booking status.
- Implemented Razorpay payment gateway for secure online payments.
- Managed backend database connectivity using MySQL for storing user, bus, and booking data.
- Created admin features to manage bus details, routes, prices, and monitor user bookings efficiently.
